How to Get Started

- **Visit** www.energystepcode.ca or your local building permit office to determine the Step Code requirements for your municipality
- **Visit** www.fortisbc.com/newhome to familiarize yourself with the Program. Feel free to contact your Energy Efficiency Representative or Energy Solutions Manager with any questions.
- **Work with** your Energy Advisor to develop a building specification that meets the required metrics of your targeted Step
- **Proceed** with FortisBC's New Home Rebate application

Application Process – Stage 1

Mid-construction

- Energy Advisor registers project
 - Collect contact and project information
 - Submits proposed building energy efficiency information
- Mid-construction blower door test highly encouraged, but not required
- \$100 to Energy Advisor

Application Process – Stage 2

End of Construction

- Energy Advisor submits final project information
 - Upload As-Built BC Energy Compliance Report
 - Upload EnerGuide label
- \$400 Toward the Energy Assessment and Rebate Issued to the Builder or Owner Based on Step Code Level Achieved

BC Energy Step Code Airtightness Training

Register your seat at: www.smallplanetsupply.com

This 1 day class will build your skills with a hands on air barrier workshop designed for the BC Energy Step Code. Over 300 have attended this class at BCIT Burnaby and now it's mobilized and available across the province.

\$250 (\$100 Discount!) - 6 CPD Credits

BCIT, Burnaby Campus - Saturday, April 6
BCIT, Burnaby Campus, Saturday, April 27
